

MIGUEL BRICEÑO GONCALVES

Java Backend Developer | Spring Boot | Microservices | REST APIs

Madrid, Spain | miguelbricenocode@gmail.com | linkedin.com/in/bricenodev | https://github.com/bricenocode/

PROFESSIONAL SUMMARY

Java Backend Developer specializing in microservices and REST APIs with Java 8/17 and Spring Boot in corporate environments. Experience developing and maintaining an MDM solution with SOAP and EJB integrations and asynchronous messaging with RabbitMQ. Skilled in JPA/Hibernate with Oracle, security using JWT and Azure AD, testing with JUnit 5 and Mockito, and Docker on Linux, applying SOLID, Clean Code, and hexagonal architecture. Currently preparing for AWS Certified Developer - Associate.

TECHNICAL SKILLS

Backend: Java 8/17, Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring AMQP, Spring Scheduling, Actuator, Hibernate, EJB, REST and SOAP APIs

Architecture: Microservices, distributed architectures, hexagonal architecture, SOLID, Clean Code, legacy systems integration

Data and messaging: Oracle, PostgreSQL, MongoDB, native SQL, query optimization, RabbitMQ, Apache Kafka, Informatica MDM (SIF)

Security and testing: JWT, JWKS, Azure AD / Microsoft Entra ID, JUnit 5, Mockito, DBUnit, Testcontainers, JaCoCo, SonarQube

DevOps and tools: Docker, Maven, Git, GitHub, GitLab, Linux, WebLogic, Swagger/OpenAPI, Python, PowerShell scripting

Frontend: Angular, React, TypeScript, Tailwind CSS

PROFESSIONAL EXPERIENCE

Java Backend Developer - Nter Tech Services

Madrid, Spain | 12/2024 - Present

- Development and maintenance of **4 Java 8/17 microservices with Spring Boot** for master data management and synchronization (MDM), across a codebase of ~333 classes and 40,500 lines of code.
- Development and maintenance of an MDM solution comprising **4 microservices** and **31 REST endpoints** documented with Swagger/OpenAPI, plus SOAP integrations and a Java component that validates business rules for requests from the corporate front end.
- Persistence management with **Spring Data JPA, Hibernate, and Oracle**, applying native SQL, pagination, and query optimization to improve data-access performance.
- Development of **asynchronous communication with RabbitMQ and Spring AMQP** for record creation, synchronization, error handling, and retries, as well as batch processes with Spring Scheduling.
- Integration with corporate systems using **EJB, WebLogic, Azure AD, JWT, and JWKS**, plus external SIF services, with monitoring through Spring Boot Actuator.
- Unit and integration testing with **JUnit, Mockito, and DBUnit**, measuring and increasing coverage with JaCoCo.
- **Automation** of deployment and support tasks with PowerShell and Python; development lifecycle with Maven, Git, and Linux environments, including code reviews and production incident resolution.

Full Stack Developer - Bricenocode (freelance projects)

Madrid, Spain | 05/2023 - 11/2024

- Custom applications using **Java, Spring Boot, and microservices**: REST API design, PostgreSQL persistence, and Swagger/OpenAPI documentation.
- Web interfaces using **Angular, React, TypeScript, and Tailwind CSS**, with responsive design.
- Security with **JWT**, containerization with Docker, automation with Python, and integration with third-party services.

EDUCATION AND CERTIFICATIONS

Higher Technician Diploma in Web Application Development (DAW) - Universidad Alfonso X el Sabio, Madrid | 2022 - 2024 | GPA: 9.8/10. Programming: Java, PHP, JavaScript, and TypeScript. Databases: Oracle and MongoDB. Development environments: Linux and Windows.

AWS Certified Developer - Associate - in preparation

LANGUAGES

Spanish: Native. **English:** B2 - technical documentation, English-language tools, and conversational proficiency.
